DETAILED ACTION

1. Receipt is acknowledged of the response filed on 12 October 2005, which has been entered in the file.

Allowable Subject Matter

2. Claims 1-19 are allowed.
3. The following is an examiner's statement of reasons for allowance:

Although, the best prior art of record to Hammond, Jr. et al. (US 5,430,286) discloses an optical assembly for detecting indicia using a beam splitter and lens, Wakimoto et al. (US 4,867,545) discloses an telecentric optical system for enabling image-forming magnification. However, Hammond, Jr. et al. and Wakimoto taken alone or in combination of other references, fail to specifically teach or fairly suggest that a symbol reader comprises a telecentric lens for receiving portions of the reflected beam from the substrate having matrix symbols which do not have reflectance and absorption factors wherein the matrix symbols are located on curved or angled surface not perpendicular to the impingement beams as presented by the applicant (see page 4, lines 11+ of the response filed on October 12, 2005) and as set forth in the claims.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
